- ✔ nginx
- ✔ jenkins
- ✔ docker
- ✔ kubernetes
- ✔ heroku CI
- ✔ gitlab CI

Tools
- ✔ ubuntu / centOS
- ✔ bash / shell scripting
- ✔ VS Code
- ✔ Postman

PROJECTS
- ✔ **web-store**
  Web store project, shopping cart, payments via credit card
  Data stored in Google Firebase – shop items, user login/pass
  Tech stack includes react, redux, router, redux-logger, reselect
  Styling done via SCSS and styled-component
  Deployed on heroku CI

- ✔ **faceRecognition**
  Login/register, upload a picture, let's detect face!
  React and scss on front-end.
  NodeJs, Express and postgres on the backend
  ClarifAI handles face recognition
  nginx configred as reverse proxy

- ✔ **homepage**
  My very own homepage, hosted on OVH VPS.
  Python + Django on the back-end.
  Postgres keeps the data.
  Bootstrap 4 on the front.
  nginx secured using certbot, using http2.

FORMAL EDUCATION
- ✔ **Bachelor of Science – Information Technology**
  Wyższa Szkoła Zarządzania i Bankowości
